

## PUBLIC NOTICE

The Baltimore City Department of Public Works is accepting public review and comments for a request a Stormwater Management Administrative Waiver for Sanitary Contract No. 871R – Improvements to the Herring Run Interceptors Phase I – From Argonne Drive to 675 Feet Southeast of Harford Road.

Notice is hereby given that the public is invited to comment on the request by Baltimore City Department of Public Works (DPW), Bureau of Water and Wastewater, Water and Wastewater Engineering Division, 305 Abel Wolman Municipal Building, 200 North Holliday Street, Baltimore, MD 21202 for a Stormwater Management (SWM) Administrative Waiver for Sanitary Contract No. 871. Comments related to this request must be received by 5:00 p.m. on Monday, December 31, 2010 to ensure consideration by the Department.

The Baltimore City Department of Public Works is proposing to relocate a section of sanitary sewer currently located in and adjacent to the Herring Run Stream. Construction of the sewer will begin near the Argonne Drive Bridge located southeast of Morgan State University. The relocated pipeline will follow the Herring Run Stream through Herring Run Park and terminate southeast of Harford Road near the ballpark. The aforementioned pipe will be abandoned and new pipe and manholes installed outside the stream bed. Improvements for this

project will include installation of approximately 4,000 feet of sanitary sewer pipe and 15 manholes/structures. No-dig technology will be used to install most of the pipe, including areas around wetlands. The work within the project area includes installing timber mat access roads, bypass pumping, reforestation, and maintenance of traffic. Reforestation efforts will also be performed in Druid Hill Park northeast of Greenspring Ave and Beechwood Drive for the additional trees required per Recreation and Parks regulations.

In order to meet the 2010 Baltimore City SWM Ordinance requirements for the proposed improvements, waivers for stormwater management water quantity and quality control are requested. Water quantity and quality control waivers are requested since the project creates no new impervious areas and the project runoff is minimized by the forested areas surrounding the site.

All notices regarding future actions of the Department on the project will be posted on the City's website.

## **Report**

A copy of the Stormwater Management report may be obtained by calling and making a request to the Department of Water and Wastewater main number: (410) 396-3428, or by visiting the office during normal business hours:

Mr. Samuel Edoror  
City of Baltimore Department of Water and Wastewater  
200 N. Holliday Street, Rm. 305  
Baltimore, Maryland 21202

## **Waiver, Comment or Questions**

**Notice regarding future actions on this will be posted.**
